

# 2024 POINT-IN-TIME HOMELESS COUNT

## Wichita-Sedgwick County

**The Point-In-Time (PIT) Homeless Count** is undertaken in communities across the United States once a year to count those who are currently experiencing homelessness. The results are reported to the U.S. Department of Housing and Urban Development (HUD) which provides federal resources to prevent and end homelessness.

The 2024 PIT Homeless Count for Wichita-Sedgwick County was conducted by community volunteers and trained professionals during one 24-hour period on Jan. 25, 2024. The 2024 initiative was organized and coordinated by United Way of the Plains through the Coalition to End Homelessness in Wichita/Sedgwick County (formerly known as the Impact ICT-Continuum of Care).

This data provides a snapshot of homelessness in Wichita-Sedgwick County. A variety of factors can influence the results of the annual count:

- Weather conditions (More people will seek shelter on colder days.)
- Variations in local, state and national homelessness prevention funding
- Changes in shelter locations
- Fluctuating economic conditions
- Local housing costs and availability
- Count methodology (including having more volunteers resulting in additional geographic coverage)

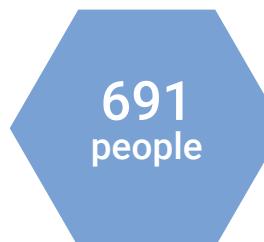

# 2024 Point-in-Time Homeless Count

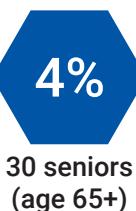

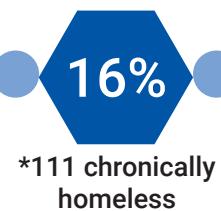

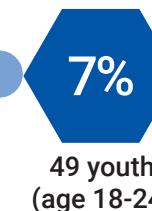

## Wichita-Sedgwick County

The Point-In-Time Count for Wichita-Sedgwick County was conducted during one 24-hour period on Jan. 25, 2024. This data collection effort is required by HUD for Wichita-Sedgwick County to receive federal funding to prevent and end homelessness. All demographic data collected, including veteran status, disability, race, gender, length of time homeless, and age is self-reported and is not verified by a third party.

### Self-Reported Demographics of Persons Experiencing Homelessness

# Annual Point-In-Time Homeless Count Results

Wichita-Sedgwick County • 2019-2024

**Sheltered Count:** Persons in shelters are counted using the Homeless Management Information System (HMIS), which collects information on unhoused persons year-round and allows agencies to communicate about clients in a single system.

**Unsheltered Count:** The unsheltered count is a simultaneous count where surveyors visit day shelters, locations where unhoused neighbors have been known to be and locations where unsheltered neighbors are likely to be found in a short time frame to reduce the possibility of double counting.

\* An unsheltered count was not conducted in 2021 due to COVID-19 restrictions and because shelters were operating at reduced capacity.

## 2023 CoC System Performance

The Continuum of Care (CoC) measures its success based on reducing the total number of people homeless, but also by how many people are housed, the length of time they are homeless before being housed, and how many return to homelessness within two years of being housed.

housed or kept in housing

average days homeless

returned to homelessness in the last two years

## Affordable Housing

The availability of affordable and appropriate housing directly impacts the number of persons experiencing homelessness and how difficult it is to end their situation through housing and supportive services.

Wichita's 2023 Housing Retention Rate is 97%, showing that prioritizing housing with supportive services is a highly successful strategy for ensuring long-term stability and preventing homelessness in our community.

**\$774**/month = market rate for a one-bedroom apartment in Sedgwick County.

(Source: HUD 2024 Fair Market Rents)

**\$16.13**/hour wage required to pay for a one-bedroom apartment in Sedgwick County.

(Source: HUD 2024 Fair Market Rents and U.S. Bureau of Labor Statistics)

**\$7.25**/hour has been the minimum wage in Sedgwick County since 2009.

(Source: Department of Labor, State of Kansas)

**82** hours/week at minimum wage needed to afford a one-bedroom apartment in Sedgwick County.

(Source: HUD 2024 Fair Market Rents and U.S. Bureau of Labor Statistics)

Note: The HUD guideline of keeping housing costs below 30 percent of income is intended to ensure that households have enough money to pay for other nondiscretionary costs; therefore, policymakers consider households who spend more than 30 percent of income on housing costs to be housing cost burdened.
